

# PRODUCTS OVERVIEW

- **DEEPCHEK® ASSAY** > GENOTYPING
- **SOFTWARE** > ANALYSIS & INTERPRETATION
- **ULTRAGENE ASSAY** > VIRAL LOAD

## SOLUTIONS

## TECHNOLOGY & CONCEPT

## DEEPCHEK® ASSAYS AND SOFTWARE FOR HBV GENOTYPING

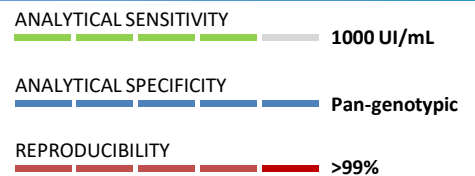

### FEATURES

- For SANGER & Next Generation Sequencing (NGS)
- Compatible with any Sanger or NGS platform
- CE-IVD software
- RUO Assays – ISO-9001 manufacturing
- Automated software workflow
- Genotyping
- Drug resistance interpretation
- Reporting
- Integration / LIS connectivity
- Services (customization, data import...)

### PERFORMANCES

- 400 µL plasma/serum - >1000 UI/mL
- Protocols for low viral loads available
- Fully-automated bioinformatics pipeline

### AVAILABLE SOON

- Robot for workflow simplification
- CE-IVD of DeepChek® Assays

## DEEPCHEK®-HBV ASSAYS

### GENOTYPING & DRUG RESISTANCE

- DeepChek®-HBV RT Genotyping and DR Assay (K-17-B-RT)

### LIVER DISEASE PROGNOSIS

- DeepChek®-HBV Core/PreCore Assay (K-17-B-Core/PreCore)

- PCR reagents: primers, enzymes...
- Nested-PCR reagents (option): primers, enzymes...
- Sanger sequencing Primers
- Protocols for Sanger and NGS
- Sanger sequencing reagents (on-demand)
- NGS Library Prep reagents (on-demand)
- Software (Sanger and NGS) included

### Extraction

Extraction kit\*

### Amplification

Thermocycler

PCR Reagents

### Sequencing

Library prep kit

Sequencer

### Data analysis

Downstream analysis software

### SANGER

### NGS\*\*

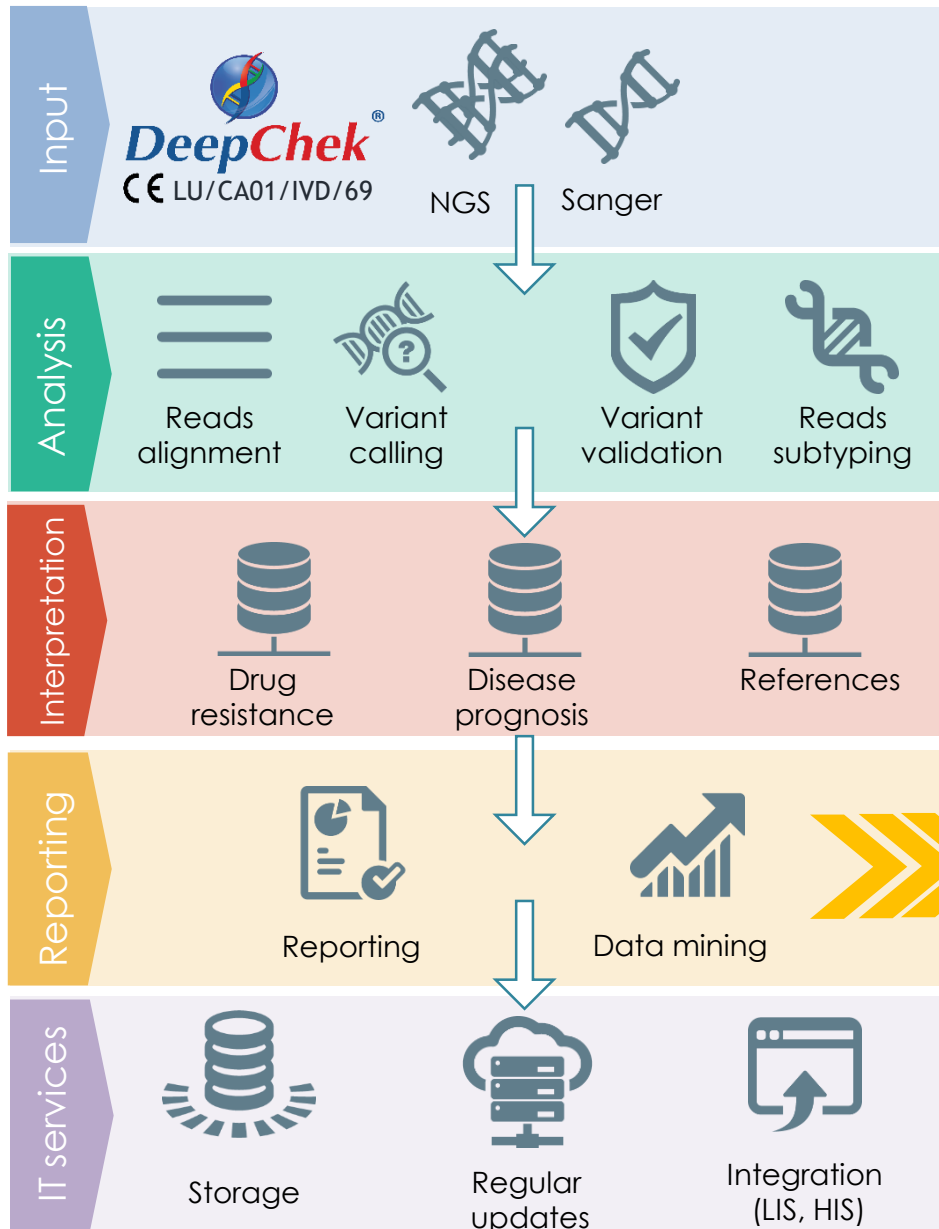

\* Several protocols available

\*\* Works on all NGS platforms (from 24 to 48 samples per run)

# DEEPCHEK®-HBV SOFTWARE

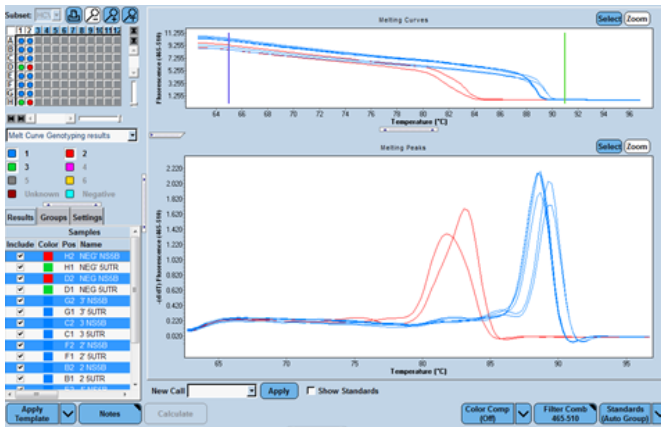

- RT + sAg + Core/PreCore + PreS1/S2 + URR + Whole Genome (including the Evivar Medial SeqHepB) database
- Sanger or NGS
- Inputs: AB1, FASTA, FASTQ, BAM...
- Manual or automated base calling
- Variant calling
- Genotyping/Subtyping
- Drug resistance through several up-to-date guidelines
- Liver disease prognosis
- Vaccine escape assessment
- Reporting (routine diagnostics and research)
- Integration with Laboratory or Hospital Information Systems (LIS / HIS)
- Available through the Cloud or local servers

# ULTRAGENE-HBV

▪ **qPCR in Disease Management**

- Real-Time PCR allows for direct detection of the amount of virus DNA in the patient samples.

Negative => Viral load not detectable

Positive => Viral load > 20 UI/mL

**Reflex  
Genotyping  
Testing**

**Amplicons ready for sequencing:**

- Genotyping, drug resistance...
- Time efficiency
- Cost efficiency
- Sample volume efficiency

**Efficiency**

**ANALYTICAL SENSITIVITY** 20 UI/mL

**ANALYTICAL SPECIFICITY** Pan-genotypic

**REPRODUCIBILITY** >99%

## CONTACT INFORMATION

- Advanced Biological Laboratories S.A.
- 17, rue des Jardiniers, L-1835 Luxembourg

- TEL : (+352) 26 38 96 761
- FAX : (+352) 26 38 96 76 31

## ORDERING INFORMATION

- DeepChek®-HBV RT Genotyping and DR Assay
- DeepChek®-HBV Core/PreCore Assay
- UltraGene®-HBV Assay (RUO)
- DeepChek®-HBV Software (CE-IVD)

K-17-B-RT  
K-17-B-Core/PreCore  
To be determined  
S-12-023 (BUS)

**ALSO AVAILABLE:**  
HIV, HCV

**AVAILABLE SOON:**  
CMV, Influenza, Herpes, HPV,  
Tuberculosis, Microbiome
