annual
meeting

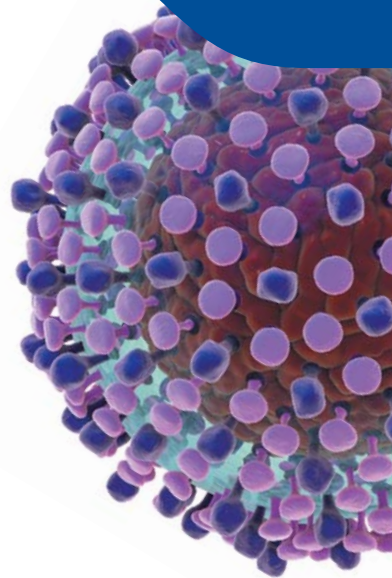

Highlights
on innovative
molecular
biology assays
designed
for detection,
quantification
and genotyping
applications
in virology

Technogenetics
Satellite
Symposium

Friday
September 15th
2017

13.45-14.45
Auditorium Hall

We are delighted to have two international experts in the field of molecular virology share their experience in clinical microbiology and laboratory management with you.

We are confident that information from these presentations will introduce you to our new solutions of reagents and softwares from Advance Biological Laboratories (ABL) for virology, that can help you in improving laboratory workflow.

A complete solution will assist you from the benchtop to data management, interpretation and reporting, in order to optimize the follow up of each patient.

13.45

Welcome and introduction

13.50

DeepChek® and ViroScore® tools for genotyping resistance test in HIV

Enzo Boeri

IRCCS San Raffaele (Milano, Italy)

14.15

DeepChek® assays for HCV genotyping

Greet Boland

*University Medical Center Utrecht (UMCU)
(Utrecht, The Netherlands)*

14.40

Closing remarks

DeepChek® and ViroScore® are products from ABL, Advanced Biological Laboratories, Luxembourg.
